EDUCATION

Master of Information, User Experience Design

Expected: April 2028

University of Toronto, Faculty of Information

Toronto, ON

Bachelor of Technology

Graduated: May 2026

Toronto Metropolitan University (formerly Ryerson University)

Toronto, ON

PROJECTS

ReconPilot – Network Reconnaissance Automation | *Python, Nmap, DNS, TCP/IP, Linux*

- Built a Python reconnaissance tool for authorized lab and CTF environments that validates user-supplied domains or IP addresses and automates repeatable network-enumeration workflows.
- Automated full TCP port scans, parsed Nmap results to identify open ports, and launched service/version detection and targeted follow-up checks based on discovered services.
- Implemented forward and reverse DNS resolution, input validation, structured output storage, and conditional SMB and HTTP enumeration to make scan results easier to review and investigate.

Canada Public Spending Dashboard | *Python, Pandas, Excel, Plotly, Streamlit*

- Processed Canadian Public Accounts transfer-payment data across organizations, fiscal years, expenditures, and authorized budgets using Python and Pandas.
- Cleaned, transformed, aggregated, and validated structured records before using them for comparisons and analysis across multiple dimensions.
- Built an interactive reporting interface with filters, charts, summary metrics, and downloadable tables to make large financial datasets easier to investigate.

EXPERIENCE

Systems & Automation Lab Administrator

Feb 2026 – Present

Independent Home Lab

Toronto, ON

- Maintain a Debian-based headless Linux environment, working with networking, DNS services, SSH, system configuration, and command-line administration.
- Investigate service and connectivity issues using logs, configuration files, network behaviour, and system state, testing changes before applying fixes.
- Develop Python utilities and lightweight automation for recurring administration tasks and document configurations and procedures for repeatable troubleshooting.

Lead Generation & Outreach Analyst

Nov 2025 – Jun 2026

URBA Media

Remote

- Researched, validated, and structured 30–60 business records per day, maintaining consistent company, contact, industry, email, and location information across CRM workflows.
- Reviewed records for missing, inconsistent, and duplicate information, improving the quality and reliability of data used in reporting and operational processes.
- Built automated Zapier workflows that reduced manual follow-up time by 30%, improving consistency across multi-step processes and reducing repetitive work.

SKILLS

Programming & Data: Python, SQL, C++ Pandas, NumPy, Microsoft Excel, Data Cleaning, Data Transformation, Data Validation, Data Analysis

Security & Networking: Cybersecurity Fundamentals, Network Enumeration, Nmap, TCP/IP, IPv4, DNS, POSIX Sockets, Service Enumeration

Systems & Development: Linux, Debian, SSH, Unix Command Line, Git, GitHub, Docker, Debugging, Testing, Technical Documentation

Reporting & Visualization: Microsoft PowerPoint, Plotly, Streamlit, Matplotlib, Data Visualization, Metrics Reporting
